## INTRODUCTION.

---

THE coinage of Mysore may be said to fall naturally into the three following distinct divisions :—

- i. Those struck prior to the usurpation of Haidar.
- ii. Those issued under the Muhammadan rule.
- iii. Those struck subsequent to the overthrow of that power and the restitution of the Hindu line.

Regarding the coins in use during the first of these three periods but very little is known. The earliest issue, known with any degree of certainty to have been that of a ruler of the province, is represented in the collection by No. 62, a coin which was struck by Kanthirava Narasa Raja, of the Udaiyar dynasty, who reigned over Mysore in the first half of the seventeenth century. This minute coin, weighing but from six to eight grains, corresponded approximately with the fanams, of which large numbers were struck by the surrounding princes and chieftains, and was probably one of the earliest of that series which subsequently formed part of the recognized system of the Hindus and of some of the European powers who struck coins in the South of India; the 'Canteroy' pagoda, to one-tenth of which this fanam was equivalent, having been merely a nominal coin. After this sovereign the history of the coinage of the country is again buried in obscurity, but there can be no doubt but that for some time prior to Haidar, the small copper coins bearing on one side the figure of a deity, an animal or a Kanarese numeral were those in common use. A large number of these copper pieces bear the figure of an elephant, sometimes alone, at others surmounted by a crescent moon, and at others again by a sun and moon. Nothing is, however, known regarding any issues in the more precious metals. Probably, as in most of the Hindu lines in Southern India, no silver coinage was at this early period in existence. It is, however, well within the range of possibility that the series of coins commonly known as the Gajapati pagoda and fanam were

in reality the issues of the Mysore kings. While a floriated device here takes the place of the chequered reverse of the copper series, the figure of the elephant agrees with the obverse, and the same emblem appears to have held its place on<sup>1</sup> the coins of the province with more or less frequency throughout all the three periods into which, as we have seen above, its monetary system seems to divide itself. The coins of this series were attributed by Moor and Marsden to the Rajas of Anagundi, by Sir Walter Elliot to the Kóngus or Chéras, and by Wilson to the Gajapati princes of Orissa, but from the fact that the elephant somewhat closely connects them with Mysore and that, while they occur in comparatively large numbers in this province, they are of considerable rarity elsewhere, it is as I have said by no means improbable that they originally hailed from the Mysore mint. It would, however perhaps, be better to postpone all notice of coins of doubtful origin to find a place in a future catalogue of the less certain issues of contemporaneous and neighbouring princes than to include them in one devoted exclusively to the coins proper of the province. In the case of the coins bearing a Kanarese numeral on one side however the same doubt does not exist. There cannot be a question but that these are purely issues of Mysore, though to what the numbers on them refer is at present unknown. Sir Walter Elliot attributes the series to Cháma Raja V., and adds that his specimens extend from one to thirty-two. During some years' searching in the province and elsewhere, however, I have never procured or seen any specimen bearing a higher numeral than thirty-one, nor are either the Government Museum at Madras or elsewhere or any private collection I know of, in possession of any beyond this number. The coins represented in the collection by Nos. 1 to 5, bearing on one side a battle axe and on the other a tiger, were first attributed to Mysore by

---

<sup>1</sup> "The princes of this (Wodeiyar) dynasty seem to have inherited the cognizance of the elephant from the Kóngus and the Chéras; for it appears on numerous copper coins which are still current in the form of the *one paisa*, or small elephant cash, and even Tipu, notwithstanding his love of innovation and contempt of every thing Hindu, continued to use it on his copper coins."—(*Num. Or. Coins of Southern India*, p. 104.)

Marsden, and his theory that they are purely Mysore coins, has not, owing to their occurrence, almost exclusively in the province since met with contradiction. The kings of the Udaiyar dynasty, during the reigns of the last of whom the coins bearing Kanarese numerals were probably issued are, according to Sir Walter Elliot, as follows :—

Ráj Wodeiyar .. .. .	1578-1617
Cháma Rája IV .. .. .	1617-1637
Immaði Rája .. .. .	1637-1638
Kaṇṭhiráva Narasa Rája .. .. .	1638-1659
Kempa Déva Rája .. .. .	1659-1672
Chikka Déva .. .. .	1672-1704
Kaṇṭhirava Rája II .. .. .	1704-1714
Dodḍa Kṛishṇa Rája .. .. .	1714-1731
Cháma Rája V .. .. .	1731-1733

during whose reign Haidar usurped the throne, with which event we enter on the second or Muhammadan period.

As far as is known Haidar struck but few coins. His pagoda, half pagoda, and fanam bore on the obverse the initial letter of his name (ಽ), while on the reverse he retained the figures of Siva and Parvati seated side by side, the former holding the trisul and the latter the deer. This device had been in use previously on the coins struck by the Polygars of Ikkeri, and on his conquest of that part in 1763 Haidar established a mint at Nagar (subsequently known as Bednur), and there struck this coin, to which the name of "Old Bahaduri pagoda" has been given. As Hawkes<sup>1</sup> in his *Sketch of the Coins of Mysore* remarks: "in process of time the dies wearing out, new ones were manufactured of precisely the same device, but with an inferior degree of skill," and of these No. 64 is a striking example. He is also said by the same author to have struck fanams at Calicut, which place he conquered in 1773 and held for some nine years. This coin is said to bear date 1166 (A.H.), but no specimen in gold from this mint, earlier than Tipu's time, finds a place in the Mysore collection. Haidar certainly struck a small half fanam, bearing

<sup>1</sup> *A Brief Sketch of the Gold, Silver and Copper Coinage of Mysore*, by Lieutenant H. P. Hawkes, Bangalore, 1856.

on one side his initial and on the other the Hijrah date, and it is possible of course that this is the Calicut issue to which Hawkes alludes, though no mint town is mentioned on the coin. During the latter years of his reign he had in circulation a limited number of copper 'paisahs' or xx cash pieces with an elephant on the obverse and on the reverse the date and place of mintage. Several also occur devoid of dates (conf. Nos. 138 to 144), many of which, from their style, may more probably be attributed to him than to his son. No such issues can however with any degree of certainty be credited to the earlier years of his reign.

Moor, in his *Narrative of Little's Detachment*, mentions the fact that on his cannon Tipu imitated the coat of arms of the English East India Company, which consisted of a shield divided transversely into four parts, in each of which appears one of the letters of the company's monogram, V.E.I.C., but substituted for these those which went to form his father's name, viz., ح ی د ر, and guns bearing this device are still sometimes met with in and around Seringapatam and Mysore. Neither he nor any other writer, however, as far as I can learn, mentions the occurrence of any such device on either Tipu's or his father's coins. The small copper issues of the period struck by the East India Company bear this device, and specimens occasionally occur, though very rarely, in which one or two characters appear which look far more like the Persian letters in Haidar's name than the initials of the East India Company. Unfortunately, however, not one has yet been found sufficiently perfect to enable one to speak with certainty. There can, however, be little doubt, but that, should these occur, both the coins and the marks on the "musquets and cannons" were more probably the work of Haidar than of his son, who was as peculiar for the neatness and fine execution of his coins as his father was for his carelessness in this respect.

Passing now to the coins of Tipu, we find at once far greater profusion, variety, and beauty combined with a number of innovations in the names of pieces and their dates which for a long time perplexed the student of numismatics. Whereas his father issued coins only in accordance with the Hindu system of pagoda and fanam, Tipu had in circulation a complete series of issues in

accordance with the mohur and rupee system of the Muhammadans as well. In all of these, from his accession in A.H. 1197 till 1200, he followed the usual Hijrah system, which dates from the flight of the prophet from Mecca, an event which took place on ' the fourth day of the first month of Rabi ; and this according to the calculation of M. Causin de Perceval was June 20th, A.D. 622. In the fifth year of his reign he abandoned this, the usual Muhammadan method of reckoning, which was in accordance with a lunar system and substituted a solar one of his own invention, to which he applied the name مولدی (Múlúdí, or as it should more properly be called Maulúdí as dating from the prophet's birth in A.D. 571, the term being derived from the Arabic "Maulúd",—born). Hence the coins struck during A.H. 1201 bear the date 1215, the numerals being written from right to left instead of from left to right as usual. In 1224 he also introduced a fresh system by which each year had a distinctive letter, the first being distinguished by ا (á), the next by ب (b), the third by ت (t) and so on according to alphabetical order up to 1227 A.M., in which year he fell at the taking of Seringapatam.

In his coins struck in accordance with the Muhammadan type of mohur and rupee, he also changed the system of cyclic years known as the ابد (abjid) then in vogue, and substituted one of his own invention in which the value attributed to each letter was in accordance with its position in the Persian alphabet, and to which he therefore assigned the name ابدت (abtas) from the first four letters, the value of each being assigned as follows :—

ا	ب	ت	ث	ج	ح	خ	د
1	2	3	4	5	6	7	8
ز	ر	ز	س	ش	ص	ض	ط
9	10	20	30	40	50	60	70
ك	ع	غ	ف	ق	ك	ل	م
80	90	100	200	300	400	500	600
ن	و	ه	ی				
700	800	900	1000				

The whole cycle was divided into sixty years as in the Brihás-pati system of the Hindus and for each year a name chosen, in

which the sum of the numerical value of the letters was equal to the year.

“ To explain this by an example, we shall take the year 42 of the cycle corresponding with 1788 of J.C., 1202 of the Hijrah, 1216 of the Sultan's new era and the sixth of his reign. The number 42 may be expressed by various combinations of the letters of the *abjad*, but if we produce it by adding together 30, 1, 10 and again 1, we shall at the same time compose the word سارا, *sára* ‘odoriferous,’ which is the name appropriated to the forty-second year of the cycle, and such we find it on the coins.” The following table will show the various methods employed by Tipu to distinguish the various years of his reign, the first column showing that of the Christian era, the second that of the Hijrah, the third that newly introduced, the fourth that of the *abjad* or year of the reign, the fifth that of the new cycle, and the sixth the literal or letter year.

A.D.	A.H.	A.M.	Year of reign.	Cyclic year.	Letter year.
1782-83 ..	1197	..	1	یکی	
1783-84 ..	1198	..	2	دو	
1784-85 ..	1199	..	3	سه	
1785-86 ..	1200	..	4	چهار	
1786-87 ..	..	1215	5	پنج	
1787-88 ..	..	1216	6	شش	
1788-89 ..	..	1217	7	هفت	
1789-90 ..	..	1218	8	هشت	
1790-91 ..	..	1219	9	نُه	
1791-92 ..	..	1220	10	ده	
1792-93 ..	..	1221	11	یازده	
1793-94 ..	..	1222	12	بهار	
1794-95 ..	..	1223	13	سپهر	
1795-96 ..	..	1224	14	گرمی	
1796-97 ..	..	1225	15	باران	ا
1797-98 ..	..	1226	16	ساز	ب
1798-99 ..	..	1227	17	ماداد	ت
				بارش	ث

At the time of the introduction of his new era Tipu also gave new names to the various coins which he struck and which were as follows :—

<sup>1</sup> Marsden's *Nomismata Orientalia*, part II, p. 704. It is to the careful research of this able numismatist that we are indebted for the explanation of the system.

GOLD.—احمدی - Ahmadi for mohur ; مدقی - Sadiki for half mohur ; فاروقی - Fārūki for pagoda ; and possibly فركى - Farkhi (or فرعى Farhi) for fanam.

SILVER.—حیدری - Haidari for double rupee ; امامی - Āmami for rupee ; عابدی - Ābadi for half rupee ; باقری - Bākri for quarter rupee ; جعفری - Jafari for one-eighth of a rupee ; کاظمی - Kāzmi for one-sixteenth of a rupee, and خیزی - Khizri for one thirty-second of a rupee.

COPPER.—مشری - Mashrabi or مشتری - Mashtari for forty cash or double paisah ; زهرا or زهره - Zahrah or Zahrā for ten cash or one paisah ; بهرام - Bahrām for five cash or half paisah ; اختر - Aktar for two and a half cash or quarter paisah, and قطب - Khatb for one and a quarter cash or one-eighth paisah.

Regarding the origin and derivations of these names I am indebted to Dr. E. Hultzsch, Ph.D., of the Archaeological Survey, for the following note:—

“One year after the introduction of his new system of dates, Tīpū invented a series of new names for his gold and silver coins. These names are well known ; but, as far as I can ascertain, they have not yet been satisfactorily explained. The names of Tīpū's series of copper coins, which, with one exception, appear first on part of the coinage of his eleventh year, the Maulūdi year 1221 or A.D. 1792-93, present no difficulty ; they are nothing but the Persian or Arabic designations of certain stars. Most of the subjoined explanations of the names of Tīpū's gold and silver coins were suggested to me by a Muhammadan gentleman, Mr. Habību-d-din of the Hyderabad Civil Service, whose acquaintance I had the pleasure of making when on a short holiday trip to Mysore and Seringapatam.

“Tīpū's gold mohur is called احمدی - Ahmadi, his half gold mohur مدقی - Siddiki, and his pagoda فاروقی - Fārūki. His silver coins are the double rupee or حیدری - Haidari, the rupee or امامی - Imami, the half rupee or عابدی - Ābadi, the quarter rupee or باقری - Bākiri, the two-anna piece or جعفری - Ja'fari, the one-anna piece or کاظمی - Kāzimi, and the half-anna piece or خیزی - Khizri.

“Among the silver coins, the rupee or Imami is undoubtedly so called after the twelve Imams. This fact gives us a clue to the derivation of the names of the remaining silver coins. Each of them, except the smallest, refers to the name of one of the Imams. The largest coin, the double rupee or Haidari, is so called from حیدر - Haidar, a surname of the first Imām علی - Āli. The fractions of the

rupee are successively named after the fourth, fifth, sixth, and seventh Imám, viz., the 'Ábidí after زين العابدين - Zainu-l-'ábidín or عابد بيمار - 'Ábid Bímár; the Bákirí after محمد باقر - Muhammad Bákir; the Ja'farí after جعفر صادق - Ja'far Sádik; and the Kázimí after موسی كاظم - Músá Kázim. The name of the half-anna piece or Khizri' is derived from خواجه - Khwája Khizr, a prophet who is said to have drunk of the fountain of life and is considered to be the saint of the waters.

"The names of Típú's gold coins likewise refer to Muhammadan saints. The gold mohur or Ahmadí is derived from احمد - Ahmad, one of the designations of the prophet himself; the Siddíkí from ابو بكر صديق - Abú Bakr Siddík, the first khalifa, and the Fárúkí from عمر فاروق - Umar Fárúk, the second khalifa.

"The largest of Típú's copper coins is the double paisá.<sup>1</sup> It bears two names: عثمانى - 'Usmání and مشترى - Mushtarí. The first of these names is met with on coins of the Maulúdí years 1218 and 1219. It is derived from عثمان بن عفان - 'Usmán ibn 'Affán, the third khalifa, and is thus connected with the above-mentioned series of names of the gold coins. When in the Maulúdí year 1221 Típú started a series of names for his smaller copper coins derived from those of different stars, the designation 'Usmání did not agree with the rest. Accordingly the double paisás of the Maulúdí year 1222 and of the following years bear a new denomination, viz., Mushtarí, the Arabic name of the planet Jupiter. The name of the paisá is زهرة or زهرا and that of the half paisá بهرام. Zuhra and Bahrán are the Persian designations of the planets Venus and Mars. The quarter paisá is اختر - Akhtar, which in Persian signifies a 'star.'

"Marsden notices 'a minute coin intended for a half Akhtar or eighth part of a paisá, on one side of which is the elephant, with the letter ت and on the other, the denomination of the money, being a word that may be read قطيب - Katib, but is by no means distinct.' My collection contains two varieties of this coin.<sup>2</sup> Both have on

<sup>1</sup> Dr. Buchanan's *Journey from Madras through the countries of Mysore, Canara, and Malabar*, vol. I., p. 128, note.

<sup>2</sup> Moor's *Narrative of the Operations of Captain Little's Detachment*, p. 475.

<sup>3</sup> The Persian spelling زهرة is found on the coins struck at Pattan (Seringsapatam), the Hindustani spelling زهرا on those struck at Nagar.

<sup>4</sup> *Numismata Orientalia Illustrata*, part II, p. 725.

<sup>5</sup> In his valuable *Catalogue of Mysore Coins in the Madras Museum*, Mr. Edgar Thurston figures a "one-eighth paisá" struck at Bangalór in 1218 and one struck at Salámábád (Satyamangalam) in the same year. I possess other coins of the same value of which one was struck at Pattan in 1218 and another in Bangalór in 1219. The third bears the date 1222 and on the reverse the two words قطب مرب, the name of the mint town having apparently been omitted by the engraver.

the obverse an elephant facing right, and on the reverse the legend ضرب پتن - 'struck at Pattan,' and over it the designation which is clearly not قطيب, but كطب - Kutb, the Arabic name of the polestar, a title which aptly fits in with the rest of the system followed by Tipú in naming his other copper coins. The first of the two coins has the letter ك over the elephant on the obverse and the date 1224 over the legend on the reverse; the second coin bears the letter ب and the date 1225 in the corresponding places. As on Tipú's larger copper issues the letters ك, ب, ت and ث stand in combination with the dates 1224, 1225, 1226, and 1227, respectively, Marsden's coin which bore the letter ت must have been struck in the Mauladí year 1226 or A.D. 1797-98."

All the coins issued during Tipú's reign also bear the name of the mint town in which they were struck, though in many instances fanciful titles apparently take the place of the name by which the town is now commonly known. Thus<sup>1</sup> Chendagal, a small village on the outskirts of Seringapatam, appears as Khala-khabád, the mint of Feiz Hissar, translated by Marsden "*in castello abundantie*" is applied to Gooty (?); the modern Bednur is known by its older appellation of Nagar: new Calicut appears as<sup>2</sup> Farakhí, Darwar as<sup>3</sup> Khúrshadsúád, Satyamangalam as Salámabád, Seringapatam as Patan or Pattan, the city par excellence, a title which one still frequently hears applied to it. Calicut and Bangalore alone appear under the names by which they are now known, while Farakhab Hissár, Nazarbár and Zafarabád remain unrecognizable among the names of modern towns in the province.

Different forms of borders also adorn the issues of the various mints. All Tipú's gold and silver coins we find surrounded by a double lined circle enclosing a ring of dots with the exception of one or two Nokaras and Rupees (conf. No. 116, pl. ii.) which are

<sup>1</sup> "Khalekabad was a name given by Tipoo to the town of Chendghaul near Seringapatam."—Hawkes' *Coins of Mysore*, p. 7.

<sup>2</sup> "On some of the copper money we find it" (فرعى) "to stand apparently for the name of a place, otherwise called new Calicut."—Marsden, p. 717.

<sup>3</sup> "The new name which Tipú has given, we understand, to Darwar, but we do not recognize in it any analogy to existing circumstances or any direction in the application other than what seems to have arisen from whim and caprice."—Moor's *Narrative of Little's Detachment*, p. 478.

ornamented with a rayed circle. The copper issues of Seringapatam, Bangalúr, Nazarbar, Kalikát and Farakhi usually have the common border, though a plain lined circle frequently adorns the obverse of those of Bangalore. Those struck at Nagar have likewise a circle of two plain lines, those of Salámabád and Zafarabád a rayed circle, those of Feiz Hissar one of dotted flowers, those of Khalakhabád and Farakhabab Hissar a ring of dashes between two lines and those of Salámabád and Zafarabád a ring of rays.

In 1799, at the fall of Seringapatam, Tipú was killed and the Hindu line in the person of Krishna Raja Udaiyar restored. The old form of pagoda, half pagoda, and fanam, bearing the figures of Siva and Parvati, was reintroduced, "Sri Krishna Raja" in Nagari character taking the place of Haidar's initial. A copper coin too, with the same reverse but with an elephant surmounted by the sun and moon on the obverse (No. 285) was struck. A series of rupees, half rupees, and quarter rupees were also put into circulation, in which the pattern of the corresponding issues of the East India Company was followed. These (Nos. 256 to 277) were struck at Mysore in the name of the reigning Mughal Emperor Shah 'Alam, but the dates on these appear utterly irreconcilable. On the obverse appears a year which one would naturally expect to follow the Hijrah system, and on the reverse the *جلوس* or year of the reign, but these neither agree with one another nor do the *جلوس* years fit in with either the reigns of the king who struck them or of him in whose name they were struck. For instance those of 1214 have the *جلوس* year 39; those of 1221, 45; those of 1222, 64; those of 1227, 95, a number incomprehensible in connection with the *جلوس* year of the reign of any sovereign. A smaller set of silver coins, known as the Chamundi series, consisting of a quarter rupee and half and quarter fanam was also struck, bearing on one side the dancing figure of Chamundi. On the reverse of the larger issue appears the name of the ruling monarch in Persian, while on the two smaller occur the words "Mayili hanna" in Kanarese, though it is hard to say what the meaning of the word <sup>1</sup>

<sup>1</sup> This word is spelt on different specimens "Mayili, Meillee, and Milay. Rice in his *Mysore Gazetteer* says: "The meaning of the word *Mayili* is not very clear. It may be connected with an old Kannada word *Muygi*, signifying *token, exchange*."

Mayili, which also appears both in Kanarese and in English on subsequent copper coins and is spelt in various ways, may mean. The copper coins of the earlier portion of the reign bear the elephant, but the later issues the lion and in 1833, when according to Hawkes the mint was transferred from Mysore to Bangalûr (though the name of the former was still preserved on the coins) the date in English was added to the obverse and the value of the piece in "cash" in the same language to the reverse. In 1843 the provincial mint was finally closed and the English coinage became the medium of exchange for the province.

68	Ae.	1193	Elephant : on a plain field standing right.	سنة ١١٩٣ ضرب پتن (Struck at Seringapatam in the year 1195. W. 188 grs.

<sup>1</sup> In each instance the date given in this column is that which occurs upon the coin. A reference to the Introduction will show the year of the Christian era to which it corresponds.

<sup>2</sup> In the villages around Seringapatam this name, which properly means "city," is still in frequent use. Regarding it Moor, in his narrative of the operations of Captain Little's detachment against Tipu, remarks: "By natives of the upper southern provinces it is called *Puttan*, as it was always in our camp and line; by those who have much intercourse with Europeans in more distant parts of the Peninsula it is, perhaps, in compliance partly with our custom called *Seringapatam*, which is the way in which intelligent Europeans pronounce it in general; by some it is called *Seringapattan*, and by others *Seringapatnam*. On all Tipu's coins it is invariably impressed پتن *Pin.*, or as we should write it in English *Puttan*."—(Moor, p. 496.)

FANAMS.				
85	Au.	1198	Haidar's initial: (ح) on a plain field within a double lined circle with ring of dots between.	ضرب پتن سنه ١١٩٨ (Struck at Seringapatam in the year 1198). W. 6.5 grs.
86	"	1199	Same as No. 85.	Same as No. 85, but date ١١٩٩ (1199).

<sup>1</sup> Moor states that this may be another name for Dharwar, but adds: "We do not recognize in it any analogy to existing circumstances, or any direction in the application other than what seems to have arisen from whim and caprice." Marsden also remarks on the peculiarity of "this farúkhi or substitute for the pagoda," and states that the name was given "by Tipu to one of the cities of his kingdom, instead of its ancient appellation, supposed to be Darwar." The fact, however, that the name Dharwar actually occurs on a similar issue of the previous year, but as far as is at present known in no other, while specimens from the Mint at Khurshidsuád occur only in the next two, renders the theory of the change of name a possible one, especially when Tipu's love of change is taken into consideration.

<sup>2</sup> In this coin the numerals signifying the year of the reign are written from right to left as in the dates of the Máládi era.

108	"	1217	Same as No. 85.	Same as No. 103, but date ١٢١٧ (1217).

<sup>1</sup> In A.M. 1215, the year in which this era was first introduced, we find coins bearing the dates of this era but written according to the Hijrah method from left to right. Later in the same year (conf. No. 99) we find the new order from right to left introduced.

<sup>2</sup> This name which occurs both on the fanams of these three years and on the cotemporaneous copper issues have been taken both by Wilks and Marsden to be that given to a fort near Kalikut known as New Kalikut.

<sup>3</sup> Bednur.

No.	Metal.	Date.	Obverse.	Reverse.
TIPU—cont.				
FANAMS—cont.				
109	Au.	1217	Same as No. 85.	ضرب عاتق آباد ١٢١٧ (Struck at Khálekhabád <sup>1</sup> 1217): in lined circle and ring of dots.
MOHUR.				
110	Au.	..	محمد دين احمد در جهان روشن است زفتح حيدر ح احمدى ضرب پتن شتا سنه ١٢١٨ In a lined circle and ring of dots. (Muhammad! The religion of Ahmed ( <i>i.e.</i> , Muhammad) is made illustrious in the world by the victory of Haidar. H. An "Ahmedi" struck at Seringapatam in the year 1218 and Cyclic year "Shata.")	هو السلطان الوحيد العادل تاريخ جلوس سال سنح سوم بهارى ٢ He alone is a great and just king. The third day of "Bahari" in the year "Sakh", the eighth year of the reign. W. 211 grs., Pl. II.

<sup>1</sup> Khálekhabád was a name given by Tipu to the town of Chendghaul near Seringapatam.

<sup>2</sup> "Ahmed," as an adjective, usually means "most praise-worthy, but as a noun it is frequently used as a name of the prophet. See foot-note to No. 115.

<sup>3</sup> Regarding the occurrence of the words تاريخ جلوس سال سنح سوم بهارى on this and similar coins, Marsden remarks: "We further observe the peculiar words سنح سوم بهارى implying the third day of the month Bahari, the object of which precise date is not immediately apparent, nor is it surprising that persons unacquainted with the names given by Tipu to the twelve months of the year should have failed to make even a plausible conjecture on the subject. An examination of the silver and gold coins of the year 1216, when the words تاريخ جلوس are added to 37 of the cycle, will clear up the difficulty and satisfy us that the third day of Pahari, or second month of the calendar, is no other than the day of his accession or that on which he extinguished the pretensions (in some degree respected by this father) of the ancient royal family and declared himself Sultan. It corresponds to the 4th May 1783 at which period he was flushed with the victory recently obtained over a British Army on the Malabar Coast."—(*Numismat Orient.*, Pl. II, p. 710).

<sup>1</sup> Marsden translates the inscription on this coin as follows: "Religio laudatissima Muhammedis in mundo illustris fit per victoriam Heideri," but allows that it is questionable whether the word محمد should be read in this conjunction, or regarded as independent of the sentence. He adds: "In either case it seems intended to stop the murmurings of those to whom the exclusion of the Hijrah could not fail to give occasion of scandal, and who might have begun to suspect their sovereign of heterodoxy. In fact there is little reason to doubt that had he reigned longer, and enjoyed the leisure of peace, he would have attempted to establish a new religion and to assume a character beyond that of a temporal prince."

<sup>2</sup> The name of the coin. See Introduction.

248	"	1226	Same as No. 232, but letter $\omega$ ( $t$ ) above the elephant.	اکhtar شرب نگر ۱۲۲۶ (An "akhtar" struck at Nagar, 1226): in double lined circle with ring of dots between.

## MUHAMMADAN PERIOD—continued.

No.	Metal.	Date.	Obverse.	Reverse.
TIPU—cont.				
FIVE CASH—cont.				
249	Ae.	1226	Figure of an elephant standing right with letter ت (t) and date ۱۲۲۶ (1226) above: in double lined circle.	بهرام ضرب فیض حصار (A "Bahrām" struck at Feiz Hissar): in single lined circle.
250	"	1226	Same as No. 249.	Same as No. 249, but اختر (ākhtar) instead of بهرام (Bahrām).
TWENTY CASH.				
251	Ae.	1227	Same as No. 232, <sup>2</sup> but letter ت (s) above.	Same as No. 239, but date ۱۲۲۷ (1227).

<sup>1</sup> On this coin the name بهرام (Bahrām) has by some accident in the mint apparently been substituted for the usual name اختر (Akhtar), and from a coin in a private collection the same mistake was made in the previous year.

<sup>2</sup> Marsden remarks that this is "probably the last specimen of his" (Tipu's) "coinage that has been preserved, and must have been struck within a month of his death; the year 1227 of his era having begun on the 6th April 1799 and the storming of Seringapatam, on which occasion he fell, having happened on the 4th May of that year, being the anniversary of his accession." (*Num. Orient.*, Pt. II, p. 724.) It would appear, however, that in reality it was in the year 1798 and not 1799 that the 17th year of his reign which on his coinage he distinguishes with the letter ت commenced. No coins smaller than the twenty cash piece have as yet been recorded, nor is any instance known of the occurrence of a forty cash.

## HINDU LINE RESTORED.

## KRISHNA RAJA.

## PAGODA.

252	Au.	?	Figures of Siva and Parvati seated side by side, the former holding the trisul.	स्वर्ण हरिताल (Sri Krishna Raja (Nag.)): on a plain field.
-----	-----	---	---	--

## HINDU LINE RESTORED—continued.

255	"	?	Same as No. 62. <sup>1</sup>	Same as No. 62.
RUPEE.				
256	Ar.	1214	<p>(سکر زد برهشت) کشور (شاه)  <sup>2</sup> فضل (اله حامی دین          محمد)          شاه عالم باد [شاه] سنه          ۱۲۱۴<sup>3</sup></p> <p>("Defender of the Muhammadan faith, reflection of divine excellence. The Emperor Shah 'Alam struck this coin to be current throughout the seven climates" in the year 1214).</p>	<p>شرب مہی سور سنہ ۱۲۱۴ جلوس          میمنت مانوس</p> <p>(Struck at Mysore in the 35th year of the auspicious reign).          W. 5 gra.</p>

<sup>1</sup> A re-coinage by the Dewan Purniah of the fanam struck by Kantirāva Narasa Raja, and called the "Gidd" or thick Canteroy fanam to distinguish it from its predecessor, with which it corresponds exactly except in this respect.

<sup>2</sup> The complete inscription, of which but a very small portion appears on each coin and its translation are taken from Marsden's *Numismata Orientalia*. On the issue figured and described by him no date appears on the obverse. This coin, known as the "Raja" rupee, follows the type of those issued by the East India Company at Arcot and elsewhere, bearing the name of the Moghal Emperor Shah 'Alam.

<sup>3</sup> The dates on these coins appear to be perfectly irreconcilable with the year of the reign given on the reverse.

SIX-AND-A-QUARTER CASH.				
291	Ae.	?	Same as No. 290.	Same as No. 290, but without the numerals. W. 44 grs.

<sup>1</sup> In this series of coins two or three slight variations occur. In the one set, represented by Nos. 281, 282 and 287, the value of the piece in English occupies the exergue on the reverse; in the other represented by Nos. 282-1 and 288; this occurs in the top line in all but the XX cash piece, the word  $\text{ॐ}$  (*chd*) appearing above it. Another slightly variant form of No. 282 also occurs which differs merely in the fact that the trunk of the elephant is slightly elevated though not so much so as in No. 283 and in some the long mark is added to the "Sri" while in others it is omitted.
